Thank you for your download!
If you have any questions that you feel should have
been in this document, please contact me.

Compatibility

This module is compatible with all 2.x Opencart versions.

Install & Configuration

You can choose between two ways: via FTP or via Extension Installer (OCmod).

- Via FTP

1 – Unzip the Facebook Page Module into your local hard drive. Using an FTP program (such as Filezilla, which is free, or a commercial package such as CuteFTP), login to your web server and copy the files from "upload" folder to your Opencart base folder, commonly called "public_html", "html", "www" or "httpdocs". If you are not sure what it is, your webhost provider will be able to tell you. All files are new. Any overwritten file, unless you have other module with same name;

2 – Login to your Opencart Admin. In Extensions -> Modules, install "Facebook Page" and click Edit;

3 - Set the configurations and save;

4 - Add the module to desired page(s) in Design -> Layout.

- Via Extension Installer (OCmod)

1 – Login to your Opencart Admin. You must have correct FTP settings enabled in System -> Settings -> FTP Tab. If you are not sure what it is, your webhost provider will be able to tell you;

2 - In Extension -> Extension Installer, click "Upload" and select the "facebookpage.ocmod.zip" file. The file will be uploaded and you will see a success message;

3 - In Extension -> Modules, install "Facebook Page" and click Edit;

4 - Set the configurations and save;

5 - Add the module to desired page(s) in Design -> Layout.

About

This module adds the Facebook's Page Plugin, which allow you to easily embed and promote any Facebook Page, on your Opencart store.

Just like on Facebook, your visitors can like and share the Page directly from your store. The great new is the display of your Facebook's page Cover, which attracts more visitor attention to your social plugin. Also, you can easily allow your customers to message you and join your Page Events!

Features

- Easy installation (FTP or OCmod);

- All files are new. Any overwritten file;

- You can set a title to be displayed above the plugin;

- You can set width and height (within the limit required by Facebook);

- Option to show or hide your page's Cover on header;

- Option to show or hide profile photos when friends like;

- Option to choose what tabs to display (timeline, events, message);

- Option to show your Page's call to action button;

- You can set plugin's locale.
